Companies in Switzerland are increasingly looking towards technology to help them deal with **HR challenges**. The low levels of unemployment and the large numbers of expatriate workers make the process of selecting, recruiting and on-boarding candidates even more difficult.

Enterprise Ireland would like to invite you to a **HR technology / innovation seminar** looking at ways in which technology can be used to make recruitment / talent acquisition processes more efficient.

With insights shared from **April Samulewicz from Takeda Pharmaceuticals** on innovation in HR and contributions from Irish companies, the seminar in a round table format will provide a base to share experience and best practice amongst the attendees.

Key Topics

- Sonru - Understand how the use of **video interviewing** can be used in the recruitment process to make significant time and cost savings for an organization.
- Source-Code - **Hiring IT Talent** – Trends and Solutions
- Social Talent - enjoy a practical masterclass in how **to improve your recruiting teams' productivity**, full of simple tips and techniques from Social Talent's Black Belt in Internet Recruiting Program, now available online in English, French and German.

Who Should Attend

- Recruitment Management
- Talent Acquisition Specialists
- HR Management
- HR IT / Digital
